2014-2015

## Principal's Message

We welcome all students returning to school eager to expand their minds for learning. The challenging learning environment is expected to enhance student growth and critical thinking skills that will be applicable towards creating goals for college and career readiness.

The success of our students depends on learning with rigorous teaching to enable students to become advance proficient in reading, writing, math, science and other subjects that will enhance a global awareness of the environment and society. A comprehensive professional development program and activities provide the teachers and paraprofessional staff with opportunities to model life-long learning, to be innovative and to continue to grow as teaching professionals.

Our teaching staff design and expand learning opportunities to meet the diverse learning styles of all students. This is accomplished through the integration of technology, student assessments, progress monitoring of student achievement, identifying student support services and actively informing parents of the learning process.

The active involvement of parents, community and friends, enables our school to teach all students that learning includes other partners to help to strengthen their educational careers while providing authentic and realistic learning experiences for ongoing future endeavors.

We strive to continually conduct learning in a safe, positive and productive environment and for all students to take ownership of becoming responsible, respectful, safe and kind. This will lead to successful student achievement as a result of applying their academic skills and talents.

Again, we welcome you back to school and are looking forward to expanding your knowledge with advanced instructional practices that will enable you to reach your highest potential.

“Onwards and upwards, hopping to the top with learning.”
